REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: This application teaches an ink-jet ink set comprising at least two ink-jet inks wherein each of the inks comprise water, a water-soluble organic solvent, a dye and a betaine compound. Each of the at least two ink jet inks have the same color hue but have different dye concentrations i.e. a light ink and a dark ink. The concentration of the betaine in the ink having the highest dye concentration (i.e. dark ink) is higher than the concentration of the betaine in the ink having the lowest dye concentration (i.e. light ink). The prior art of record generally teaches ink-jet ink sets comprising at least two ink-jet inks wherein each of the inks comprise water, a water-soluble organic solvent, a dye and a betaine compound wherein the inks have the same color hue but different dye concentrations i.e. a light ink and a dark ink and the betaine concentration is the same in both the light and dark inks but fail to teach or fairly suggest that the dark ink has a betaine concentration higher than the betaine concentration of the light ink as claimed by applicants. Accordingly, this application is allowable.

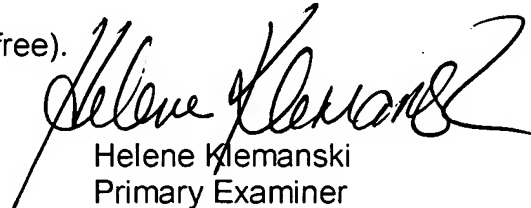

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helene Klemanski whose telephone number is (571) 272-1370. The examiner can normally be reached on Monday-Friday 5:30-2:00.
